High quality, reliable and competitively priced system for:

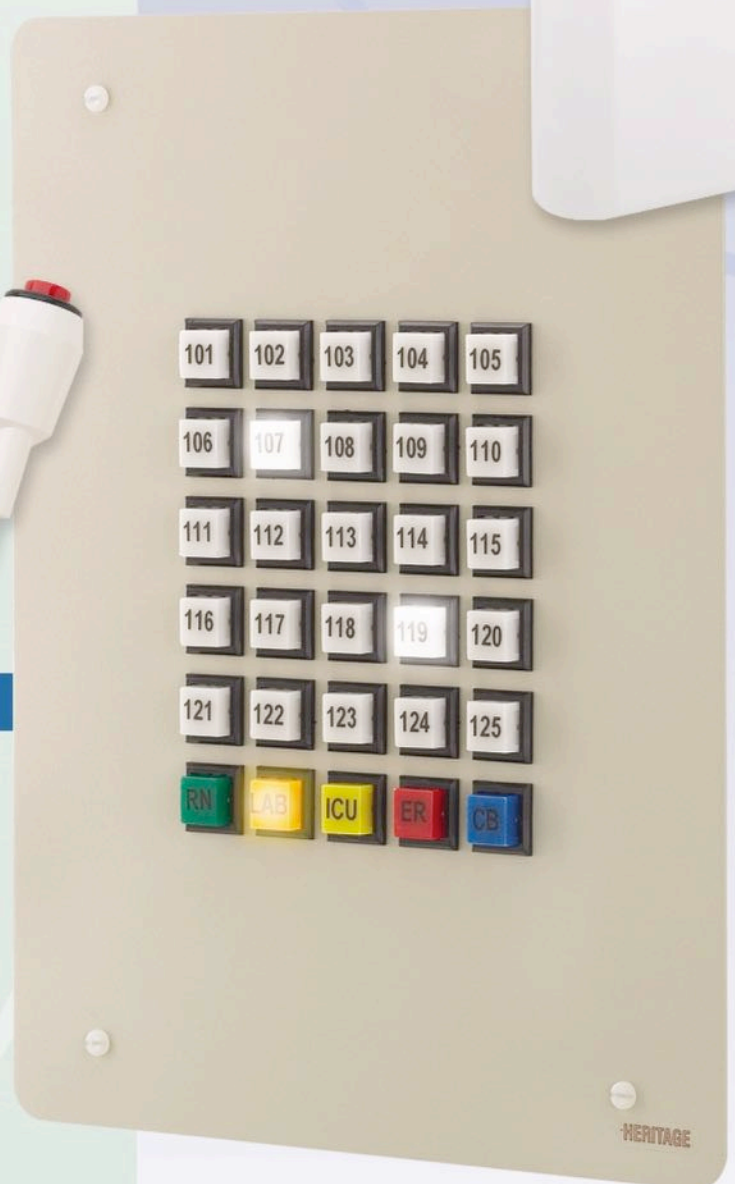

HEALTHCARE FACILITIES

OUTPATIENT CLINICS

ICU - CCU - OR - ED

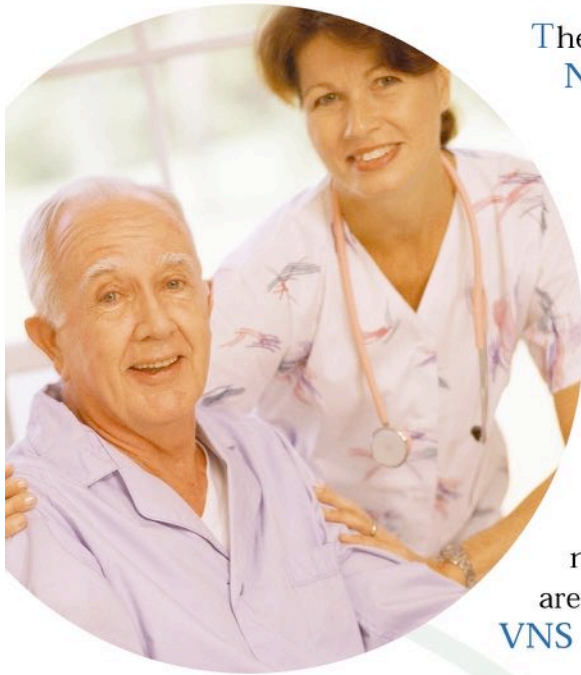

SURGERY CENTERS

NURSING HOMES/SENIOR LIVING FACILITIES

### Featuring:

- Three discriminate codes for different types of calls
- Single and double patient stations, with flexible call cord options – including oxygen, geriatric and orthopedic.
- Simple and quick installation in new and existing facilities
- UL 1069 and CUL certification
- Call canceling at station – insuring personal attention to patients' needs

## The Heritage MedCall Visual Nurse-call System (VNS)

has been designed to meet patient call needs.

In hospitals, nursing homes, clinics, day surgery centers and outpatient facilities, VNS provides both visual and tone signaling to fulfill patient and staff needs.

In those areas where non-voice communications are needed, Heritage MedCall's VNS is the answer.

VNS is easy to use for patients and staff.

Three distinctive signals can indicate the type of patient call and provide flexibility so each facility can custom-design the applications of their system. A special repeated tone signal reminds nurses that a call remains unanswered. Heritage VNS light panels can discriminate between routine, emergency and code calls. VNS comes with UL and CUL 1069 compliance and rigorous, 100% quality assurance testing, making it the very best value for your facility.

With our available options and stations, VNS is flexible enough to grow with your facility. Emergency call stations, including code blue, are clearly labeled for ease of use. VNS uses standard bed cords for ease of operation. Optional features include call cords designed specifically for disabled patients, and for geriatric patients, a lighter touch option is available.

VNS is the ideal system as you expand, renovate or remodel. Simple, low cost wiring provides flexibility and expandability for economical installations. And with VNS, future upgrades are always available as your facility changes and expands.

### ADDITIONAL OPTIONS:

- Presence stations can be added to the system to locate staff and patients.
- Integration with pager systems is also available.

Heritage MedCall is a culmination of 18 years of experience in the healthcare industry and with a network of 90 dealers is ready to support you with design, installation and service.
